

# M-22 Digital Piano

Cabinet Finish

Black High Gloss

Dark Rosewood

Suzuki invites everyone to enjoy the rich and resonant sounds of a concert hall piano in the comfort of your own home. It's possible with the new M-22, Suzuki's most affordable digital piano. Contemporary and sophisticated in design, it complements any décor.

The M-22 Home Digital Piano delivers deep, dynamic acoustic piano sound and so much more. Advanced sound imaging technology, 16 instrument voices, tone mixing, and digital effects put countless possibilities for customized sound at your fingertips. The Advanced Graded Hammer Action Keybed duplicates both the weight and the mechanical movement

of our fine acoustic grand pianos. The key touch is heavier for low notes and lighter for high notes to simulate the string thickness, hammer size and damper in a grand piano, sure to meet the standards of the most discerning player or teacher.

Teach yourself to play with built-in music instruction and 50 play-along songs or with the included software bundle. Create and playback your own compositions. Practice silently with optional stereo headphones. You can even plug into your home stereo for your expanded listening pleasure or connect your MP3 player or CD Player and play along with your favorite tracks.
